G2 PCR Plates

• The G2 PCR consumables is the latest version of our PCR plastics. It stands for best level of us on injection molds.

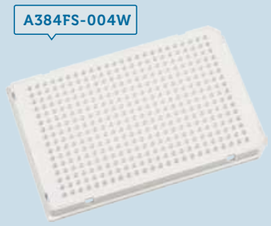

• To ensure the result of your researchers, we tested more than 30 kinds of polypropylene, and chose the best one, the special polypropylene could help to fit blocks of cyclers from both PCR and (q)PCR.

- We would like to let you know our G2 PCR Plates and Strips are produced base on top quality standard.
- Now they could work up to 97% of current PCR machines around the world.
- Every plate is produced in the 100,000 level dust clean workshop, so it's DNase and RNase free, No human DNA, Non-pyrogenic.
- The improved polypropylene made the well transparent for easy observation. Especially, uniform thin wall to 0.30mm for optimal heat transfer.
- 3 Types: Non-skirted, Semi-skirted and Full-skirted.

GenFollower®

5 Racks per Pack Available!

Thinner wall of entrance brings you a softer hand feeling to reduce damage to the wrist in long-term use.

More graduations could meet a wider variety of volume pipetting needs and achieve more precise pipetting.

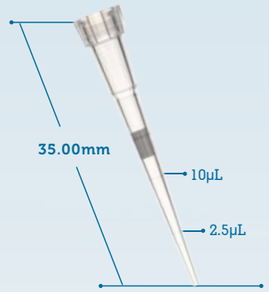

Rack of the tips is up to ANSI-SLAS standard, which make it compatible with workstations using non-exclusive or non-specific tips.

This product has passed the RoHS (2011/65/EU and its amendment 2015/863) test covering ten restricted hazardous substances, as well as key REACH SVHC screenings including Cd, Pb, PHTH, and PAHs.
All results comply with EU environmental regulations and the product is suitable for export to the EU and US markets.

How to resue empty rack with Ecolayer?

1. Unwrap the Ecolayer and prepare an empty rack without a lid.
2. Place the Ecolayer on the rack, pressing down to affix the pipette tips.
3. Lift the refill system and snap on the bottom support bracket.
4. Cover the rack with its lid and close it up, ready for the next use.

Single Wafer Refill Pack

- User-friendly and effortless to load.
- Ensured sterilized packaging to maintain purity and prevent cross-contamination.
- A new eco-friendly solution: save on plastic by reusing pipette tip racks, and save expenses in the lab too.

How to Use Single Wafer Refill Pack ?

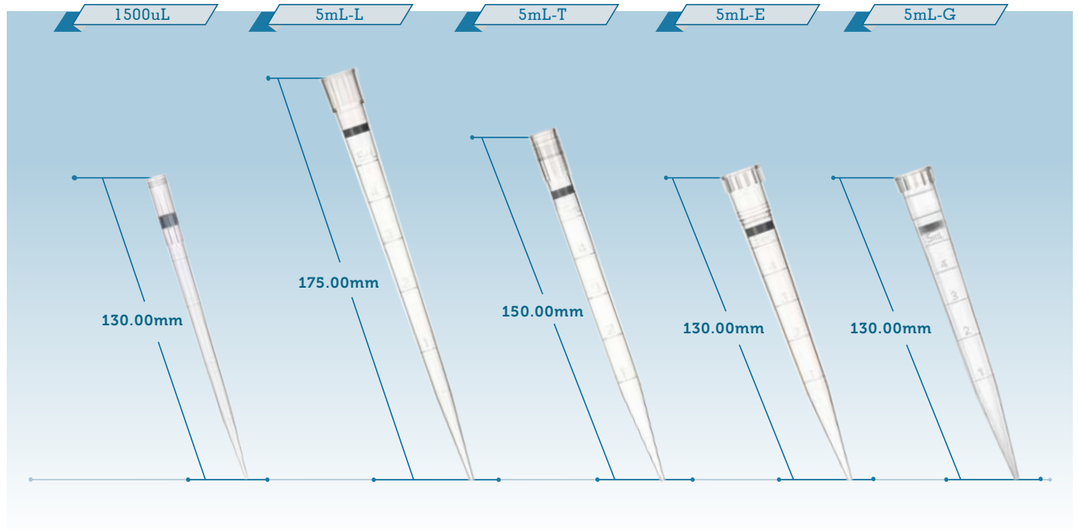

1. Unwrap the single wafer refill and grab an empty tip rack without the lid.
2. Put the refill pack on the rack and press down to attach the pipette tips securely.
3. Remove the refill pack once the tips are in place.
4. Cover the rack with its lid and close it up, all set for the next use!

Large Volume Filter Pipette Tips

Large & Small entrance Available!

- The transparent tip with clear graduations allows easy observation while pipetting.
- Compatible with major pipette brands like Dragon, Brand, Thermo, Eppendorf, and others.
- Vital for liquid manipulation tasks including cell culture and sample prep.

Please kindly note: In the context of 10mL-X/5mL-X, this notation refers to the letter right after Cat. #5000 and Cat. #10000.

Reagent Reservoirs

- It works with multi-channel pipettes and workstations, making work faster and more accurate.
- Individually packaged for cleanliness and easy use.
- The reservoir can handle various liquid samples and is great for dispensing bulk liquids accurately.

Wide Bore Filter Pipette Tips

· The wide orifice is ideal for handling high-viscosity samples while concurrently minimizing shear forces, safeguarding delicate samples from potential damage.

· Universally compatible with a range of pipettes, ensuring seamless integration and adaptability for diverse laboratory applications.

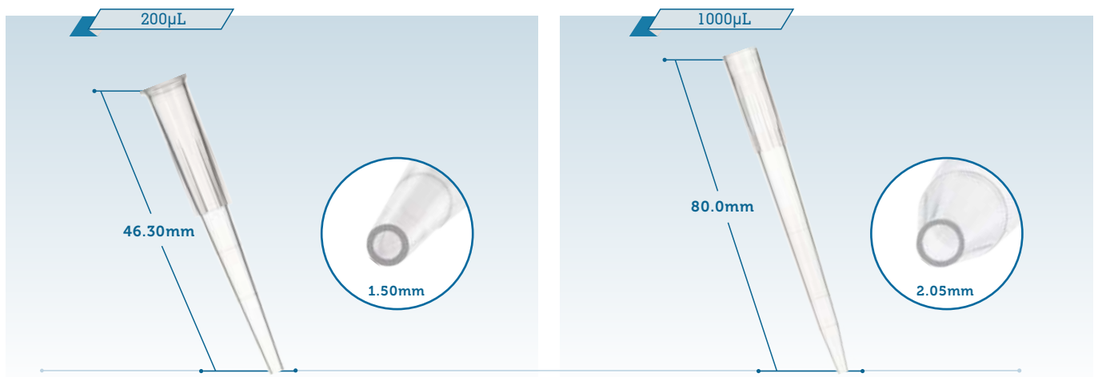

· Sterilized, free of Dnase, RNase, DNA, and pyrogens, ensuring a clean environment for sensitive experiments.

Gel-loading Pipette Tips

· Easily load tiny 1-microliter samples without damaging the gel.

· Compatible with most pipettes used in labs, excluding Rainin LTS and Thermo Clip-Tip.

· Ideal for loading samples in SDS-PAGE electrophoresis, agarose gel electrophoresis, 2-D electrophoresis, and more.

ELISA Plates

- Flat bottom, U bottom, V bottom are available .
- SBS/ANSI footprint could work with many brands of automatic working station.
- Detachable plate is convenient for researchers to transfer sample for different treatment.

GenFollower®

Centrifuge Tubes

Maximum to 12,000 xg

We currently supply 5 types of screw cap centrifuge tubes to meet various needs.

1. Achieve a maximum centrifugal force of up to 12,000xg or 16,000xg.
2. Clear graduations ensure accuraty of samples.
3. Highly visible marking areas make it easy to distinguish and classify samples.
4. Keeping statement of Dnase, Rnase and pyrogenic free.

15mL centrifuge tube

B-CTB15YE | B-CTB15YE-AM

Bag packaging

Plastic foam rack / Paper rack packaging

25mL centrifuge tube

CTB25BL

Bag packaging

Plastic foam rack / Paper rack packaging

50mL centrifuge tube

B-CTB50YE | B-2SCTB50YE | B-SCTB50YE | B-CTB50YE-AM

Bag packaging

Plastic foam rack / Paper rack packaging

Micro Centrifuge Tubes

- All micro centrifuge tubes are made of polypropylene.
- The maximum speed is 25,000 xg.
- Flap caps are attached to open and close conveniently.
- Tubes with a frosted writing area on the flat cap and the tube.
- Meanwhile, clear graduation on the tube for easier observation.
- All tubes are certfied to be autoclavable at +121℃.

It means MCTB015YE is yellow 1.5mL micro centrifuge tubes.

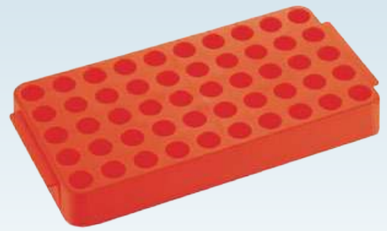

GenFollower®

Racks For Tubes & Vials

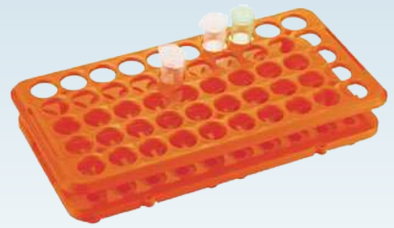

121°C

- Made in PP, PC or HIPS material.
- PP racks offer excellent chemical resistance and stability. Autoclavable for routine sterilisation.
- HIPS racks provide greater toughness and a smooth surface finish. Not suitable for autoclaving.
- PC racks are durable.
- Suitable for routine laboratory operations where many test tubes are handled.

Screw Cap Culture Tubes

- Our patented screw cap design prevents liquid splashing and ensures safe centrifugation.
- The white writing area and flat cap provide a convenient space for clear marking and labeling.
- Clear graduations ensure precise liquid transfer.
- These tubes support both aerobic and anaerobic cultures.

Cell Scrapers & Lifters

GD00018

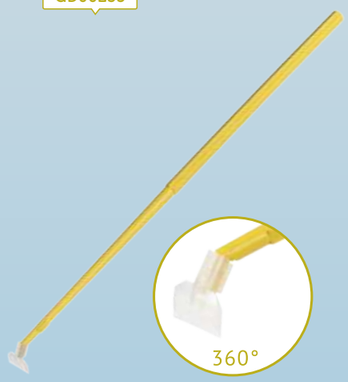

Cell Scrapers

- Blades are made of special TPE the Blade could be adjusted to fit any angle in the petri dishes, helps reseachers collect cells as more as possible.
- Customized packaging is available.
- Rnase and DNase free, No Human DNA, endotoxin free.

GD00025

GD00235

GD00030

CD00018

Cell Lifters

- Made of quality PP clear and straight blades greatly avoid damage to cells during lifting.
- Wider blade could increase efficiency, save precious time of researchers.
- The improved angle of blade could avoid crowd to cells during the operation.
- Customized packaging is available.
- Rnase and DNase free, No Human DNA, endotoxin free.

Please kindly note

Packaging quantity could be customized, such as 10PCS/Bag or 25 PCS/Bag.
Please contact us if you have such different requirements.

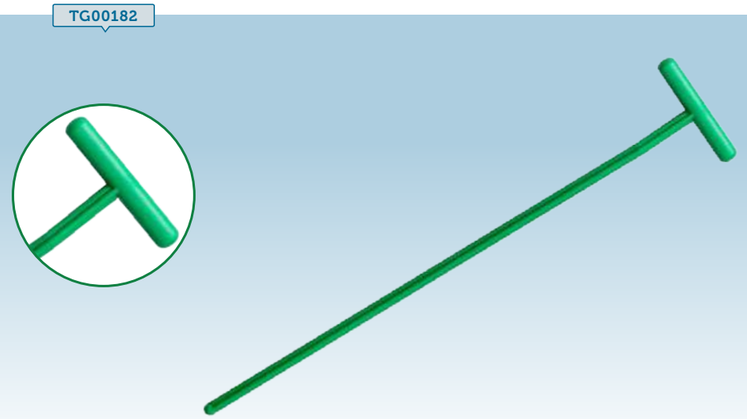

Cell Spreaders

- 2 types of cell spreaders available: "L" and "T" shape.
- Both spreaders are made of quality HIPS.
- Extremely smooth of the surface.
- Individual packaging, pre-sterilized, DNase free, RNase free, endotoxin free, No human DNA.

Please kindly note: Packaging quantity could be customized, such as 10PCS/Bag or 25 PCS/Bag. Please contact us if you have such different requirements.

Serological Pipettes

- Easily identified with color code
- Cotton plugged for safety
- Individual wrapped
- Optical-grade polystyrene (PS)
- Accury: ±2%
- Sterile, non-Pyrogenic, free of DNA, DNase, RNase

Liquid Handling Workstation

Liquid Handling Workstation is a better solution for high-throughput manual pipetting with two ranges of 0.5~20ul (M20) and 5~200ul (M200), which have been applied in many fields, such as template copying, transferring between 96-well plates and 384-well plates, orifice cleaning, dilution and ELISA / EIA.

reduce pipetting steps effectively

>Less than 6 seconds to complete one time of 96-well plate pipetting by hand.

>Only 4 steps for 384-well plate with 2 times within 1 minute.

Increase your data accuracy

>Start or stop the enzymatic reaction or cell experiments at the same time

>Eliminates the difference between well to well.

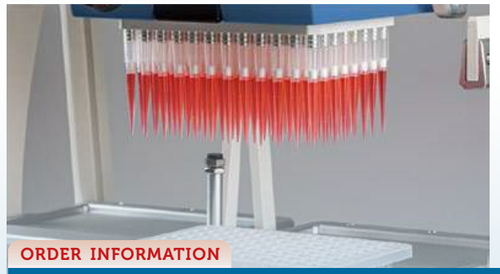

>Improves the reproducibility from well to well and from plate to plate

>Never skips or repeats pipetting.

Easy and safe to use

>Provide a ultra-fast pipetting with no programming, no plug-in and no training.

ORDER INFORMATION

Product Name	Volume Range	Structure	Packaging	Cat.#	Size / Case (CM)			Weight / Case(Kg)	MOQ
					L	W	H		
Liquid Handling Workstation	0.5-20μL	Desktop	1 PC / Case	M20	63	50	70	30.10	1 PC
	5-200μL	Desktop	1 PC / Case	M200	63	50	70	30.10	1 PC

Please kindly note The weight is for reference only. Due to reinforced packaging for transport, please contact us to confirm the exact weight of the M20/M200 machines.

Dry Bath Incubator

· The GMB-1520 digital dry bath heaters are outstanding products with broad temperature range and accurate control, which also have a patent in preventing from scald.

· The digital panel of our products is easy and quick to operate, which gives life science researchers the convenience and the efficiency they need when working with precious samples.

Have a patent in anti-scald

>When the block temperature reach to 150°C, the temperature of the panel and the body are below 50°C.

Wide temperature range

>Temperature can reach to 150°C

Rapid heating time

>Finish heating within 15min

3 steps of programs preset

>Preset programs can be changed and combined as you like.

Digital touchable keyboard & Full screen

ORDER INFORMATION

Product Name	Capacity Size	Structure	Packaging	Cat.#	Size / Case (CM)			Weight / Case(Kg)	MOQ
					L	W	H		
Dual Block Dry Bath Incubator	0.2/1.5/2.0/5.0mL tube	Desktop	1 PC / Case	GMB-1520	33	27	18	5.40	1 PC

Mini Microcentrifuge

Genfollower Mini Centrifuges are flexible and cost-effective, allowing any workstation to be equipped with a "personal" mini centrifuge. Humanized preset timing function design enables the instrument to carry out one-click timing. The instruments are equipped with a mixed rotor and a variety of tube sleeves, available for 2.0ml, 1.5ml, 0.5ml and 0.2ml micro centrifuge tubes.

Speed maximum up to 10,000 rpm

> Adjusted speed maximum up to 10,000 rpm, freely switchable to meet different experimental requirements

Humanized time preset

>3 sets of common time preset: 3s, 10s, 30s

Safe to use

> When over 6,000 rpm, the lid will be in a buffer before fully open, waiting for the high-speed rotating rotor to slow down for safety
> Electromagnetic switch: Close the lid to start and open to stop

Designed with the composite rotor

>Suitable for 6x0.5/1.5/2.0ml centrifuge tubes and 2x8x0.2ml PCR tube strips

Compact and lightweight

Microplate Centrifuge

C-MP2 is an instantaneous centrifuge specially designed for microplates, which is convenient to quickly spin down droplets. Equipped with a dual-position vertical rotor, it accepts a wide variety of PCR plates, including 96-well plates, 384-well plates, skirted plates and non skirted plates.

A variety of PCR plates available

>Accept skirted, non-skirted and all standard PCR plates

Quickly spin down droplets in PCR plates

>Set hot key "Short" for quick and convenient spinning

Adjustable speed

>Maximum speed can reach 3000rpm

Touchable screen displayed

>LED screen and touchable

ORDER INFORMATION

Product Name	Rotor	Structure	Packaging	Cat.#	Size / Case (CM)			Weight / Case(Kg)	MOQ
					L	W	H		
Microplate Centrifuge	2 PCR plates	Desktop	1 PC / Case	C-MP2	33	30	30	5.10	1 PC

Mini Vortex Mixer

Mini vortex mixer is an ideal vortex mixer with its tiny size and easy-to-use, and it is designed for oscillating and blending of various reagents, solutions, chemicals and other samples. Simply push the tube into the soft attachment to start shaking. It is used for mixing samples in small containers (maximum 50mL centrifuge tube) and has the function of inching.

Simple operation

>Push the tube into the soft attachment to start shaking, and stops when tube lifted.

Small size, compact and lightweight

>One hand can hold the device

Two modes are available for choosing

>Pulsing mode for short time mixing sample (inching)
>Continuous mode (long time continuous operation)

A variety of containers available

>Maximum 50ml centrifuge tube

Adjustable speed

>Maximum speed can reach 4500rpm

Portable

>Support car cigarette lighter to convert power supply

ORDER INFORMATION

Product Name	Capacity Size	Structure	Packaging	Cat.#	Size / Case (CM)			Weight / Case(Kg)	MOQ
					L	W	H		
Mini Vortex Mixer	maximum 50mL tube	Portable	1 PC / Case	MI-42D	17	17	21	1.20	1 PC
Mini Vortex Mixer	maximum 50mL tube	Portable	1 PC / Case	MI-45	17	17	21	1.20	1 PC

Multi-tube Vortex Mixer

MM-5015 multi-tube vortex mixer is used to prepare samples by mixing tubes just prior to testing with compact and simple in appearance. It can maximum mix 50 samples at the same time. Variety of accessories are also available to be selected to meet the mixing needs with different specifications of test tubes. Built-in continuous mode and pulse mode enable the instruments suitable for biotechnology, microbiology and medical analysis.

Built-in timing function

>Able to be set mixing time within 00:00~99:59h
>The display window shows the remnant time to do timing

Two modes are available for choosing

>Pulse mode
>Continuous mode

Make the experiment more efficient

>Maximum 50 samples mixing at the same time

Adjustable speed

>Ranging from 500 rpm – 2500 rpm

Different types of foam tube racks and pads to replace

>Support a variety of consumables

ORDER INFORMATION

Product Name	Capacity Size	Structure	Packaging	Cat.#	Size / Case (CM)			Weight / Case(Kg)	MOQ
					L	W	H		
Multi-tube Vortex Mixer	Different Foams Available	Desktop	1 PC / Case	MM-5015	57	29	48	15.50	1 PC

Vertical Rotating Mixer

MM-V5016 Vertical Rotating Mixer provides efficient but gentle mixing to keep the sample in suspension status. With its adjustable speed, the rotating mixer is widely used in blood mixing, preventing blood clots, latex diagnosis, immunoprecipitation and similar applications. Equipped with a large-size color LCD screen and adopted full touch operation mode, the instrument can quickly input time, speed and other parameters, which meets the researchers' needs for modernization of bench-top instruments.

Large size screen to display

>Color LCD screen and adopt full touch operation mode

Optional different tube holder frames available

>Including but not limited to 16 x 50 mL and 16 x 15 mL centrifuge tubes

Smooth and steady operation

>360° vertical circulation rotation

Intelligent and efficient

>Controlled by microprocessor and allow 5 programs to run in sequence

ORDER INFORMATION

Mobile Thermostatic Boxes

The patented Mobile Thermostatic Box, also known as MOBOX, is a full temperature thermostat with optional lithiumion battery. The temperature control stability is ±0.1℃, and the control range is 0-70℃. It has excellent performance in the application of constant temperature reaction, sample transferring, anatomy and incubation, and is loved by the majority of scientific researchers.

Temperature stability ±0.1℃

Temperature control accuracy ±0.3℃

Multifunction in wide application

>Ice box, sample incubation platform, dissection table and heating reactor

Optional lithium-ion battery

>Work last for 4-5 hours at constant temperature 25℃;
>Work last for 1-2 hours in large temperature difference between the sample and the outside

Mobile

>Easy to carry for sample transferring when you go out

Support on-board power supply

>No worries if the battery runs out

Blu-ray Gel Cutting Apparatus

UV-C108 is a lightweight replacement of the traditional UV transmission instrument, applied in clearly observing and cutting the nucleic acid in the dyeing gel. The machine adopts world-class LED blue light source with long life, and creatively adds adjustable light intensity function to ensure the moderate brightness of the strip to the maximum extent, helping to protect your eyes and take a clear picture of the experimental results.

>Blue light protects users from exposure to uv damage but no damage for DNA fragments.

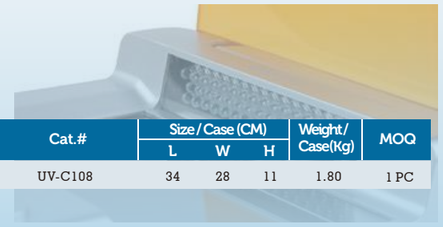

>The selected optical grade shortwave cut-off filter can filter blue light efficiently, making the background of the gel picture clean and easy to observe

>Selected wear-resistant and scratch-resistant bottom plate

>The brightness can be adjusted by the brightness adjustment knob

>Exquisite and Compact Design and easy to carry

Semi Automated Plate Heat Sealer

The semi-automated plate heat sealer plays a key role in preserving this integrity by securely heat-sealing dedicated heat-sealing films over various microplates—including PCR plates, deep-well plates, ELISA plates, and cell culture plates.

Superior Anti-Scald Safety

> Body surface remains below 50°C even when the sealer heats to 200°C.

Fast & Uniform Heating

> Reaches 200°C in under 5 minutes with precise temperature control (±1°C).

Intelligent Touchscreen Operation

> 4.3-inch color touchscreen with programmable settings and automatic sealing counter.

Wide Compatibility

> Adjustable pressure and temperature fit various plates and films for both heat and cold sealing.

Smart Energy Saving

> Auto enters standby and deep sleep modes to conserve power.

Automatic Sealing Counter

> Built-in system automatically tracks and records the total number of seals performed.
